- Please include return shipping label and instructions with all shipments
- All distributors / film makers are responsible for inbound and outbound customs clearance, tax and shipping requirements

New 1570 film deliveries to arrive on site no later than **Friday 19th May 2019**

- 1570 – all films must be supplied in individual cases
 - Please note there may be additional customs delays for 1570 print inbound shipments, so please allow enough time in your shipping schedule to meet delivery deadline.
 - If the print is supplied in rolls, an empty case is required to return this.

New Digital film deliveries to arrive on site no later than **Friday 19th May 2019**

- **KDM** to be valid from date of 19th May 2019

Trailers and Films in Production to arrive on site no later than **Friday 19th May 2019**

Trailers and films in production may be submitted either as a digital download, or via a shipped thumb drive

For digital downloads:

- Please email low@planetarium.dk and administrator@euromax.org with download / FTP information
- If necessary, the expeditor will have to specify the logins and password

Digital Insert System (temporarily upgraded) – Q&A

- **What is 3D brightness in foot-laberts (fL) per eye?**
We will provide this information before the end of March 2019, on request.
- **What is maximum bit rate?**
We will provide this information before the end of March 2019, on request.
- **What are projector and server details?**
The projector will be a Barco DP4K-32B, lamp-based Xenon 4K DLP cinema projector with 33000 Lumens. The server will be a Barco Alchemy (ICMP) integrated server with 6TB of effective storage. We don't have yet the serial number and certificate of the server, but we will send you as soon as we have it. The projected image size is circa 16 x 8.6 m.
